

Practice Questions:

1. Write a program that takes a student's score (between 0 and 100) and prints the corresponding grade:
 - a. 90-100: A
 - b. 80-89: B
 - c. 70-79: C
 - d. 60-69: D
 - e. Below 60: F
2. Write a program that takes three numbers as input and prints the largest of the three.
3. Write a program that takes a character as input and checks whether it is a vowel (a, e, i, o, u) or a consonant.
4. Write a program that asks the user for the current temperature and prints whether it's hot (above 30°C), warm (20°C - 30°C), cool (10°C - 19°C), or cold (below 10°C).
5. Write a program that simulates a simple login system. Ask the user for a username and password. If both match predefined values, print "Login successful," otherwise print "Login failed."
6. Write a program that takes two integer inputs from the user. The program should return true if:
 - a. Either of the input values is 6.
 - b. The sum of the two values is 6.
 - c. The absolute difference between the two values is 6.
 - i. You can use `Math.abs()` to calculate the absolute difference.
7. Write a program that stores 5 numbers in an array and prints the largest number.
8. Create a program that asks the user for 5 numbers, stores them in an array, and prints how many of those numbers are even.
9. Write a program that prints the multiplication table for any number the user provides.
10. Given an array of ints, return true if the array contains either 3 even or 3 odd values all next to each other.
